ANNOUNCEMENTS FOR OFFICE.

We are authorized to announce

E. P. NEAL.

Of Covington, Kentucky, candidate for Commonwealth of the Sixth Judicial District of Kentucky, composed of the counties of Mason, Boone and Maysville. Elect November 8th, 1892.

DEMOCRATIC TICKET.

FOR PRESIDENT,

GROVER CLEVELAND,

OF NEW YORK.

FOR VICE PRESIDENT,

ADLAINE E. STEVENSON,

OF Illinois.

FOR CONGRESS,

A. B. MONTGOMERY.

FOR CIRCUIT JUDGE,

W. T. OWEN.

FOR COMMONWEALTH'S ATTORNEY,

J. EDWIN ROWE.

FOR SHERIFF,

JAMES P. STEVENS.

FOR CIRCUIT COURT CLERK,

GABRIEL B. LIKENS.

The significant silence of the Hart-ford *Republicans* upon the subject of Mr. Neal's independent candidacy, would seem to indicate that it rather approves of independent candidates. Perhaps it does.

Do the alleged organ of the Republican party in Ohio county have any opinions on the subject of an independent Republican candidate? Is it afraid or ashamed of E. P. Neal?

Let no man be ignorant of the issues which make up the present political situation. The appearance of Hon. A. B. Montgomery's addresses in another column and go out and hear him.

Worth characteristic cowardice the *Republican* is silent as the grave relative to Mr. Neal's candidacy for Congress. Let us tell the truth, the *Republican* would make a most fitting organ for an independent candidate.

J. B. RUCKER, editor of the *Summer-est Reporter*, was murdered by an assassin on Monday night. He was shot in the back as he was coming home from his office. If the coward who shot him is overtaken, a convenient rope will no doubt end his murderous career.

It is noticeable that Hon. C. M. Barrett, in making up a list of independent candidates, publicists steer significantly clear of Ohio county.

His Col. Barnett outfit, outgrown the county of his nativity, or does he not know that here he has a rifle chilly to shoot for his shameful butchery of Mr. J. S. R. Welding?

The Republican party, al-

ways ready to catch at straws, has the fastidious Mr. Neal's independent candidacy. Still, it has another instance of the tail wagging the dog? Will that party "endorse" Mr. Neal's present independent views, as he seems to have it impossible to him to do? The very bad views of that party?—Perhaps it does.

Especially we give the final result of the primary to choose candidates for Judge and Attorney. This is the last act in the work of clearing the field for the final fight in November. The party has chosen its men and its measures and it holds bold forward with both a hand and a clenched fist, the world to come to its order, the world to make shift, apology or denial. It has put out good men, and standing up on a platform which claims the spirit and temper of our people it can be said is castly detailed.

The purpose—and the sole purpose—of these men is to defeat a and dismember the "tariff" taxation.

UNLESS RAIN CAME

These Mexicans Threatened to Kill Priests and Nuns—Some Remarkable Resolutions.

(Continued from page 1.)

The action of the Mexican Government in its movement toward confiscating the property of the Catholic Church has been so far manifested in a degree when it is known to what absurd extremes Mexican officials will go on some occasions. Some days ago at Torreon, in Coahuila, the Bishop of the city was brought to the station all cut and hacked to pieces. He had been taken for a copper and was being punished for causing the government to fight them. This, however, is not the mark to what an extreme at Coahuila a few days ago. In the department of Coahuila there had been no rain for nearly a year, and people were getting so dry that they were actually dying of thirst, to say nothing of the total destruction of all crops and other agricultural industries. El Pueblo Catholic of New San Salvador, priest, proposed the resolutions presented by the hierarchy of the town and Department of Coahuila. They are as follows:

"Considering that the Supreme Council of the Catholic Church has issued, as in the whole of last year, one shower of rain fell, that in this same year notwithstanding all the processes, prayers and praises, it has not rained at all, and that the property of Coahuila, on which depend the property of the whole department, are entirely ruined, it is decreed:

"Article 1. If within the mandatory period of three months the necessary rain does not fall abundant, no one will go to mass or say prayers.

"Article 2. If the trough continues dry, then the churches and chapels shall be burned down, missals, rosaries and other objects of devotion will be destroyed.

"Article 3. If, finally, in a third period of three months it shall not rain, all the priests, nuns, clerics, clerks and females, will be haled-off and for the present permission is given for the commission of all sorts of sins in order that the people of Coahuila, under such a curse, will have to do.

The most remarkable feature of this affair is the fact that four days after these resolutions were passed the heaviest rainfall known for years was experienced in the mining community.

A Cure For Paralysis.

Frank Corbin, 100, of New Haven, Conn., says, "I induced Mr. Pinson, whose wife had paralysis in the foot, to buy a bottle of Chamberlain's Pain Balm. To their great surprise before the bottle had all been used she was a perfect invalid again. The bottle was drawn to one side; but the Pain Balm relieved all the pain. I am sure it is a safe and sure cure in its natural state. It is also a certain cure for rheumatism, lame back, sprains, swellings, etc. It is a good receipt for sale by Z. Wayne Griffin & Bro.

Executive's Report.

I will on the first day of next November, in Circuit Court, at the Court House door in New Haven, Ky., for sale by public auction, the remains of Joseph Hamilton Barnes farm, among his personal effects. The above is a fine stock farm, and timber enough on it to keep it up. Terms of sale made known by J. W. PATE, Executor.

Is the Soul an Odor?

The Berlin Correspondent of November 17, 1876, contained a report of some remarkable experiments made by Dr. Dusmett, begun for the express purpose of testing the correctness of Dr. Jaeger's view that the soul of every man and animal is to be sought for in the characteristic odor exhaled by each.

Dusmett, who is a renowned physiologist, made his experiments, after making his life-confirmed experiments, an outspoken opponent of Jaeger's views. Since that time, however, he has been an enthusiastic convert to Jaeger's views. The nerves of smell in a dog were the principal organ upon which to collect the "soul exhalations" of other and more timid animals. He accordingly put a large dog into a cage, and had a laboratory and gave orders to the animal to put 20 rabbits in it. After these directions had been carried out a large dog was admitted to the room. He at once began to bark and snarl, and the nerves of smell in a dog were the principal organ upon which to collect the "soul exhalations" of other and more timid animals.

EDUCATIONAL AND OTHER MATTERS.

By W. L. Hawkins.

Train the mind first; stock it after. A good name is easily forfeited; and to win back when once lost.

The most helpful books are those which you think to be the most useful; never mind a "thrashing," the best "work" for the measured young one in the district.

Problem, to be solved by arithmetic. The difference of two numbers is 8; and the half of the smaller equals 1. Therefore, the same length of time. Therefore, the glycerine mixture might be expected to contain a small amount of a "thrashing," the best "work" for the measured young one in the district.

Problem, to be solved by arithmetic. The difference of two numbers is 8; and the half of the smaller equals 1.

O—Gloria in excess is Latin and means glory in the highest. No, never use the Latin, but if you want to use the sentiment in conversation, say "glory in the highest."

It is a fact which perplexes the mind of the student, that it seems to prove: A few drops of the mixture were administered to a cat, and, after it had been given a few drops of the mixture, it was in a cage with some mice. In

the first, it was observed that the cat shrank away and lay down, as though it was about to sleep. The mixture had been administered to the cat, and, after it had been given a few drops of the mixture, it was in a cage with some mice. In
